SUMMARY

Fresh graduate in Informatics Engineering with a BNSP Associate Data Scientist certification and hands-on training in Data Analytics through Excel, SQL, and Python bootcamps. Skilled in collecting, cleaning, and exploring data, building SQL queries, and performing exploratory data analysis (EDA) to produce clear, accurate, and decision-ready insights. Additional applied experience across classification, clustering, and predictive modeling projects strengthens my ability to understand data beyond surface-level reporting. Detail-oriented and analytical, seeking to contribute as a Data Analyst, while continuing to grow toward a long-term career as a Data Scientist through hands-on experience in data-driven problem solving.

EDUCATION

Bachelor of Informatics Engineering

Mercu Buana University – Jakarta, Indonesia

August 2022 – February 2026

GPA: 3.87/4.00

Thesis Research:

"Classification and Analysis of Food Insecurity News Text Using IndoBERT and IndoBERT-SVM Algorithms"

- Classified 2,700+ news articles on food insecurity in Indonesia into three risk categories (Safe, Vulnerable, Alert) using IndoBERT and IndoBERT-SVM models, applying keyword-based tagging on news data collected between January 2021 and June 2025.
- Processed and cleaned 2,708 of 2,715 collected news articles, successfully classifying 2,201 items to support automated, text-based food security monitoring.
- Evaluated model performance across multiple epoch configurations (3, 5, 7, 10) using accuracy, precision, recall, and F1-score, identifying IndoBERT at 10 epochs as the best-performing model, outperforming IndoBERT-SVM.

EXPERIENCE

Laravel Developer

Winnicode Garuda Teknologi – Internship

March 2025 – July 2025

- Designed and developed a full-stack Employee Attendance Management System using Laravel and MySQL, architecting a dual-role structure with dedicated authentication and access control for Employee and Admin users..
- Built real-time attendance tracking, a leave request module with an approval workflow, and an admin dashboard with attendance data visualizations, giving management clear visibility into workforce activity.
- Automated PDF export for daily and monthly attendance reports, streamlining a previously manual reporting process
- Managed end-to-end CRUD operations across employee, attendance, and leave data, and collaborated closely with a mentor on debugging, testing, and performance optimization to deliver a stable, production-ready application.

PROJECTS

Classification and Regression of Indonesia's Gender Empowerment Index (IDG)

- Built KNN classification and Linear Regression models in Python to analyze and forecast Indonesia's Gender Empowerment Index across regencies/cities (2021–2023), applying leakage-free preprocessing to ensure valid, reproducible results.

Nutritional Value Classification of Food and Beverages

- Developed an Artificial Neural Network (ANN) in Python to classify nutritional value levels (Low/Medium/High), running structured experiments across optimizer, activation function, and learning rate to improve model accuracy.

Chayote Freshness Clustering

- Applied K-Means clustering on color and texture features extracted from images to group chayote freshness levels, using Silhouette Score to objectively select the optimal number of clusters.

Student Performance Classification: Decision Tree vs. KNN

- Compared Decision Tree and KNN models to classify student pass/fail status, using EDA-driven feature selection and cross-validated hyperparameter tuning to identify the best-performing approach.

CERTIFICATIONS

- BNSP – Associate Data Scientist
- IBM – IBM Data Science Professional Certificate
- Microsoft – Data Analysis and Visualization with Power BI
- Google – Google AI Professional Certificate
- DQLab Study Case Bootcamp – Machine Learning & AI for Beginners, Data Analyst with SQL & Python, Data Analyst with Excel
- Cisco Networking Academy – CCNA: Introduction to Networks

SKILLS

Hard Skills: Python, SQL, Excel, Machine Learning (Classification, Clustering), Exploratory Data Analysis (EDA), Statistical Analysis, Data Visualization (Power BI), Web Scraping, Laravel, MySQL

Soft Skills: Discipline, Communication, Analytical Thinking, Attention to Detail, Problem-Solving, Collaboration
